South Plainfield Radiology, Corp Earns MRI Reaccreditation by IAC

Magnetic Resonance Imaging (MRI) is an extremely useful diagnostic imaging tool, performed on an estimated 10 million patients annually in the United States, enabling interpreting physicians to visualize the structure and function of the body. As it provides detailed images of the soft tissue of the body, MRI is especially helpful in diagnosing related neurological, musculoskeletal, cardiovascular and oncological conditions.

There are many factors that contribute to an accurate diagnosis based on MRI. The training and experience of the technologist performing the procedure, the type of equipment used and the quality assessment metrics each facility is required to measure, all contribute to a positive patient outcome. IAC accreditation is a “seal of approval” that patients can rely on as an indicator of consistent quality care and a commitment to continuous improvement.

South Plainfield Radiology, Corp located in SOUTH PLAINFIELD, NJ has been granted a three-year term of accreditation by the Intersocietal Accreditation Commission (IAC) in MRI in the area(s) of Musculoskeletal MRI and Neurological MRI. This latest accreditation awarded to South Plainfield Radiology, Corp demonstrates the facility’s ongoing commitment to providing quality patient care in MRI.

Accreditation by the IAC indicates that South Plainfield Radiology, Corp has undergone an intensive application and review process and is found to be in compliance with the published *Standards*, thus demonstrating a commitment to quality patient care in MRI. Comprised of a detailed self-evaluation followed by a thorough review by a panel of medical experts, the IAC accreditation process enables both the critical operational and technical components of the applicant facility to be assessed, including representative case studies and their corresponding final reports.

About IAC

The IAC is a nonprofit organization in operation to evaluate and accredit facilities that provide diagnostic imaging and interventional-based procedures, thus improving the quality of patient care provided in private offices, clinics and hospitals where such services are performed. The IAC provides accreditation programs for vascular testing, echocardiography, nuclear/PET, MRI, diagnostic CT, dental CT, carotid stenting, vein treatment and management, vascular interventional, cardiac electrophysiology and cardiovascular catheterization. The IAC programs for accreditation are dedicated to ensuring quality patient care and promoting health care and all support one common mission: Improving health care through accreditation®. Committed to its mission through a rigorous peer review process, the IAC has granted accreditation to more than 14,000 sites since its inception in 1991.
